# JHU Data Services

WE HELP FACULTY, RESEARCHERS AND STUDENTS:

**FIND**

**USE**

**VISUALIZE**

**MANAGE**

**SHARE**

**DATA**

# Agenda

1. What is Business Analyst?
2. What data is available? (Esri Demographics)
3. How do I start? (demonstrations)
4. Questions

# What is Business Analyst?

# What is it?

- Part of Esri's suite of geospatial tools
- Available as a **web app**<sup>\*</sup>, desktop/enterprise software, mobile app
- Provides easy access to **location-based** demographic, marketing, and business data
- Designed for both **data analysis** and **data visualization**

<sup>\*</sup>accessible as part of ArcGIS Online, Esri web GIS platform

# What do I use it for?

## Create Maps

- Create color-coded maps visualizing various commercial and public data
- Search for and map points of interest based on name, NAICS or SIC code

## Build Infographics

- Use templates or build your own to **visualize** key indicators for an **area**\*

## Build Reports

- Use templates or build your own to **download** key indicators for an **area**\* in pdf or excel format

## Analyze Locations

- Perform a **suitability analysis** (identify sites that meet your defined criteria)
- Perform a **void analysis** (detect voids and gaps in specific businesses and services)
- Create a **threshold area** (create a ring that meets a specified variable)

\*such as a **point** (store location), a **boundary** (neighborhood), or a **buffer** (5-mile radius from a point)

# Sample Use Cases

## I want to...

- create a map showing city precinct boundaries, color-coded by the percent of the population who are 18+, overlaid with the location of polling stations in Baltimore, MD.
- create a visual of the consumer spending habits of people living within a 5, 10 and 15 minute walk of a potential grocery store location.
- download a spreadsheet on educational attainment metrics for a neighborhood to conduct further analysis.
- perform a void analysis to determine where there is a lack of medical care facilities in a region of Baltimore, MD.

# What Data is Available?

# Esri Demographics Data

- A global collection of authoritative demographic data for over 150 countries and regions
- Data sources include government sources (ie: US Census Bureau), as well as commercial datasets (ie: Infogroup, DataAxle)
- Thousands of attributes describing geographic areas across the world at multiple levels of geography
- Regularly updated with the latest available data\*

*\*when a dataset is updated, the older version of that dataset will often become unavailable via Business Analyst, and can only be purchased from Esri for a fee.*

# Esri Demographics Data

Examine data via Esri's Data Browser and documentation pages

[https://bit.ly/esri\\_databrowser](https://bit.ly/esri_databrowser)

## ▼ Get started

What is Esri Demographics data

What's new

Data Browser

Data enrichment

# How do I start?

Demo time!

# Demonstration

## What We'll Cover

- How to access Business Analyst Online (BAO)
- Create a quick color-coded map
- Adding layers/data from ArcGIS Online
- Adding data directly in BAO
- Creating a report
- Creating an infographic
- Accessing tutorials

# Demonstration Topic

## **Health Insurance Coverage – or lack thereof – and medical care:**

1. Create map – 2020 Pop65+ with no health insurance
2. Add layers from ArcGIS Online:
  - primary care clinics servicing uninsured persons
  - Baltimore city neighborhoods
3. Create report for a neighborhood
4. Create 5,10,15 minute walk buffers around clinics
  - Run a comparison
  - Create an infographic
5. Build a custom infographic

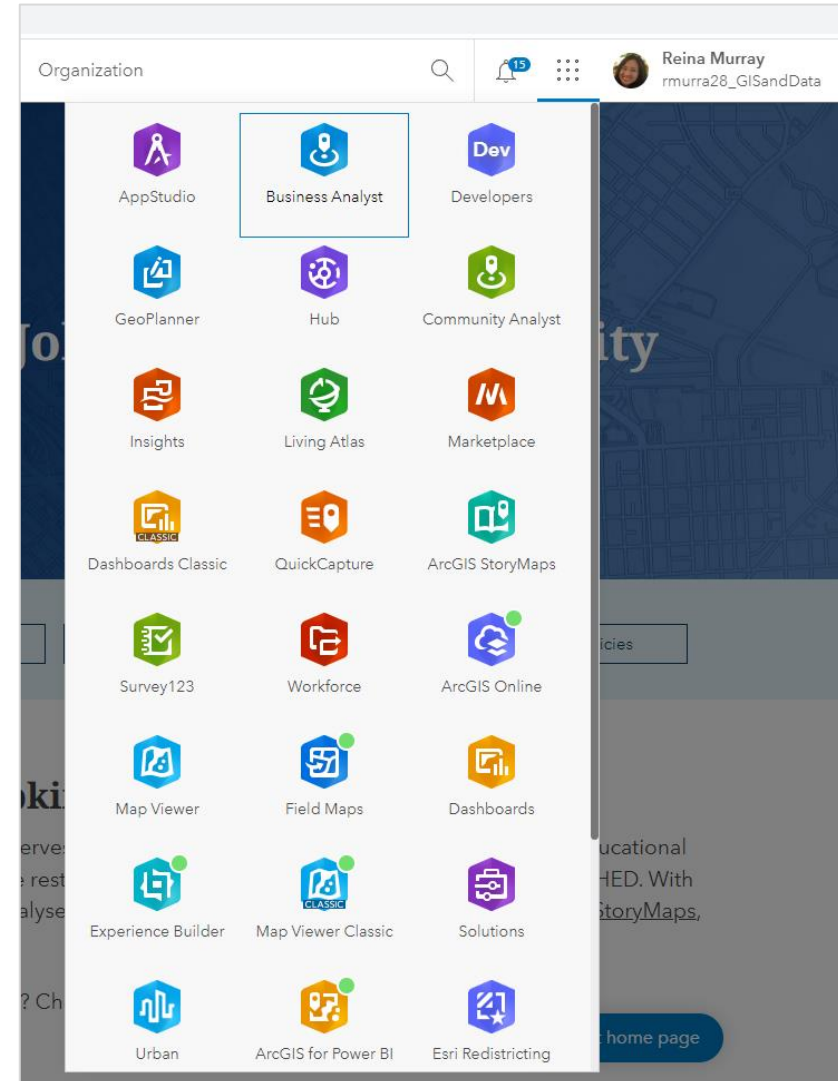

*Datasets are available in:*

<https://gisanddata.maps.arcgis.com/home/group.html?id=0cf602de3dfb425ba0a3236eea11a529>

# How do I access it?

- Business Analyst is accessed through **JHU's ArcGIS Online organization**
- As long as you have an active and valid JHED, you have access to JHU's suite of Esri software and web applications

See <https://guides.library.jhu.edu/gis>

 Highlights >

# Fall 2022 Data Bytes Schedule

*All sessions are on Mondays from 12 to 1 pm.*

**Finding Maps and Map Data**  
Sept 12<sup>th</sup>

**Choosing a Python IDE**  
Sept 19<sup>th</sup>

**Creating Infographics in  
Business Analyst**  
Sept 26<sup>th</sup>

**Debugging your Python Code**  
Oct 3<sup>rd</sup>

**Speeding up your Python Code**  
Oct 10<sup>th</sup>

**Introduction to Leaflet**  
Oct 17<sup>th</sup>

**Advanced StoryMaps  
Tips and Tricks**  
Oct 24<sup>th</sup>

**Introduction to APIs in R**  
Oct 31<sup>st</sup> 

**GIS and Maps  
Programming**
